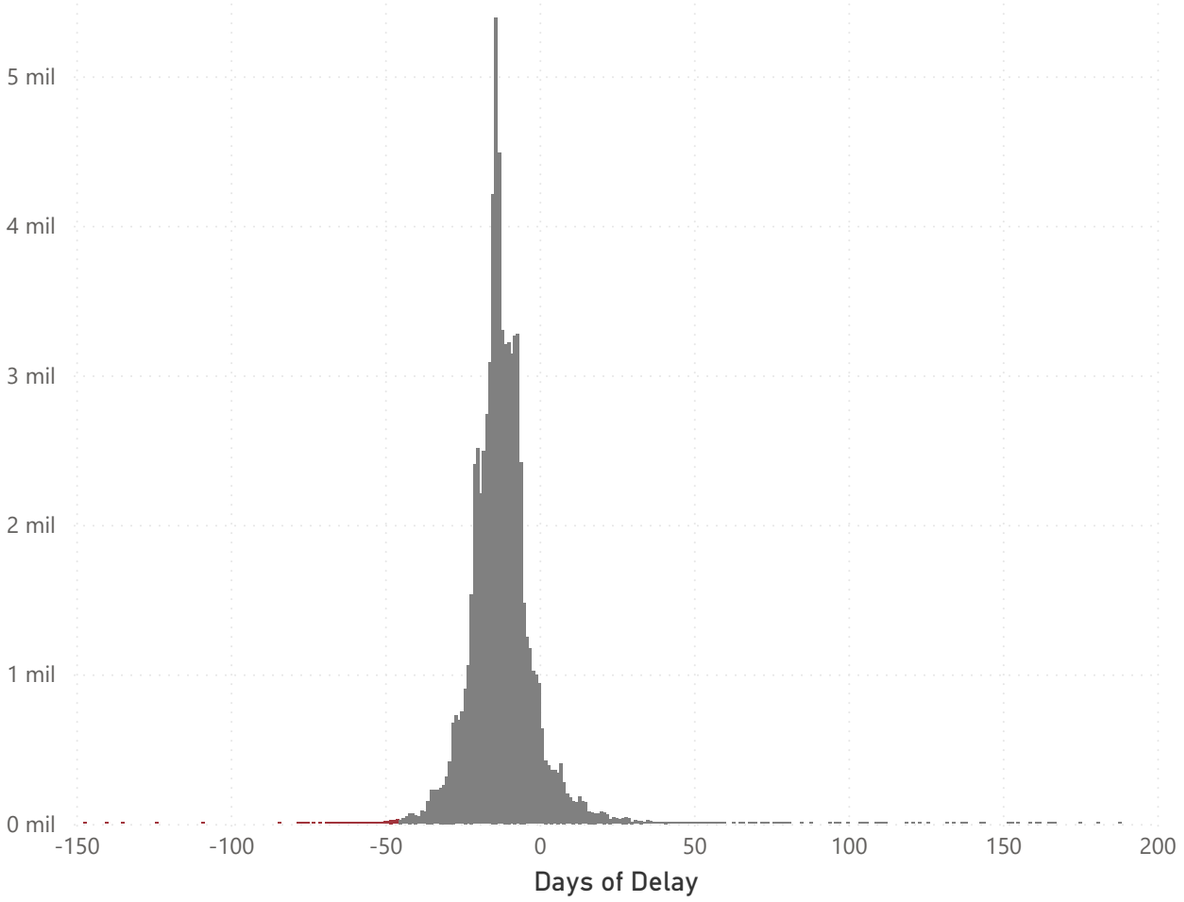
Data Quality Audit: Systemic Bias & Data Debt

Data Governance Alert:
The system applies a standard ~14-day safety buffer (SLA padding) to all estimates.
However, extreme outliers (-50 to -150 days) indicate corrupt database entries (Data Debt) that must be filtered before training any future predictive routing models.

Delivery Estimates: The -14 Days SLA Padding



231

Outliers / Data Debt (<-45 days)

Data Debt: Extreme Outliers (<-45 Days)
